2.3 Extending variants for your online shop.....	8

## 1.0 Introduction

Welcome to the iLabPOS Product Variants Manual.

Product variants are used in several retail sectors, most notably in food and clothing . The near exact same product can come in different sizes, colours, weight, and these are what we call variants.

This manual will guide you on how to input and manage product variants in iLabPOS. Furthermore, this manual will guide you on how variants are integrated with your online shop if you have one.

## 2.0 Product Variants

### 2.1 Is it necessary to manage variants?

Let's take an example where you are selling a T-Shirt in different colours and sizes.

The first thing you need to check is whether the blue T-Shirt has a different barcode than the red T-Shirt. Then you also need to decide how important it is for you to know how many of each type of the same T-Shirt you have in stock.

If all the variations have the same barcode number (which should not normally be the case), and you are not interested in knowing how many of each colour you have, but rather you just wish to know the total quantity of all colours (or if you are not interested in managing stock), then managing variants is not necessary.

On the other-hand, if you are interested to know exactly how many Large T-Shirts in colour red are in stock, and if each variant of the T-Shirt has a different barcode, then you will need to manage variants. If the manufacturer is not providing you with different barcodes for the variants, but you still wish to manage variants, then you will have to print barcodes yourself.

## 2.2 Inputting Variants in iLabPOS for retail purposes.

Further on we shall explain how variants should be extended if you also have an online shop integrated with iLabPOS. For the moment we shall only tackle inputting the variants so that you are able to scan and sell from your shop. If you do have an integrated online shop, read both this section and the next before proceeding to actually input any products.

If you wish to manage stock per variant, then you need to create a separate article for each variant with the different barcode. Add a new article in iLabPOS for the first variant, as you would normally add any other article. In the article name, specify the size and the colour, this way you can identify this particular variant in reports, receipts, etc...

The screenshot shows the 'ARTICLE - DETAIL' form in iLabPOS. The form is divided into several sections:

- Main Details:**
  - Bar Code / Code: 909000077
  - Article ref. code: RSHIRT
  - Article Name: ADIDAS T-SHIRT - BLUE / LARGE (Note: For optimum use with i-Touch, use a space after every 13 chars)
  - Full Name: ADIDAS T-SHIRT - BLUE / LARGE
  - Stock Category: 021 - PARTS AND ACCESSORIES
  - Department (VAT%): F - FULL 18%
  - 1st Supplier: ALL DAY OFFICE SUPPLIES
  - Brand: NOT SPECIFIED
  - Date Added: 09/12/2019
  - Last Sold: / /
  - Discontinued:
- Pricing Table:**

	EUR excl. VAT	EUR incl. VAT
Retail	20.339	24.000
Wholesale	0.000	0.000
Selling Price #3	0.000	0.000
Reseller Price	0.000	0.000
Price #5	0.000	0.000
Consumer Price (rrp)	0.000	EUR (incl. VAT)
- Costs:**
  - Last Cost EUR: 0.000
  - Last Additional Cost: 0.000 EUR
  - Average Cost (excl.): 0.000 EUR
- Inventory & Logistics:**
  - Used for weight articles:  (Click help for more info.)
  - Standard Barcode:  Decimals:
  - Warranty Period:
  - Re-order Point: -1.00
  - Re-order Qty: 0.00
  - Stock Qty: 4.00
  - Stock Units: SKU (SKU, Kgs, Metres etc...)
  - Shelf:
  - Color: Blue
  - Size: Large
  - Loyalty Points: No Points (0.00)
  - Non Stockable:  Kit?:
- Display & Sales Options:**
  - Article System No.: 351
  - Always allow Price Change:
  - Show on Sales Catalogue:
  - Pallet QTY: 0.00
  - Case QTY: 0.00
  - No QuikScan:
  - Last Expiry Date: / /
  - iTouch Direct: N/A
  - Kitchen: N/A

Notice the example above. We have specified the colour and the size in the Article Name. It would also be ideal if you specify a common "Article ref. Code" for all variants of a product. Some products would not have a common reference code, so you can invent one yourself, such as R001 or similar. This way you would have an easy way how to group all the variants

for the same product together. For retail purposes, you do not need to input the Size and Colour again in the separate fields on the bottom right side.

Once you save the article, click on "Copy to Variant". A new article page will appear with a copy of the first article you created, however with an empty barcode (or the new next barcode if auto-barcoding is enabled). Simply enter the barcode for the next variant, make any modifications in the price if necessary, amend the Article Name with the new colour and/or size and save again.

Now you should have 2 different variants, and by using the "Copy to Variant" feature, you can quickly add several more variants.

In the example below, we have 3 variants and by searching with the common article reference code, we can group all 3 variants at one go.

The screenshot shows the 'ARTICLES' management interface. At the top, it displays 'User: LEO' and 'Terminal: Mosta'. The main area is divided into two sections: a search filter form and a list of articles.

**Search Filter Form:**

- Bar Code: [Empty]
- Article Name: [Empty]
- Category: [Empty]
- Brand: [Empty]
- Master Barcode: [Empty]
- Article Ref. Code: **RSHIRT**
- Supplier: [Empty]
- Department (Tax): [Empty]
- Notes: [Empty]
- Shelf: [Empty]
- Retail between: [-1.00] and [-1.00]
- Loyalty Points Type: **\*\*\* ALL \*\*\***
- Checkboxes:  Show Kits Only,  Published on Web Shop Only,  Master Arts. Only,  Showing on Sales Catalogue,  On Sale Only

**Articles List:**

Articles: 3     Exclude Non-Stockable     Low Stock not Set     Low Stock     Auto Locate on New     Hide Discontinued

Bar Code	Article Name	Ref. Code	Supplier	Category	Department (Tax Rate)	Price #1	Brand
909000077	ADIDAS T-SHIRT - BLUE / LARGE	RSHIRT	ALL DAY OFFICE SUPPI	PARTS AND ACCESSORI	FULL 18%	24.00	NOT SPECIFIED
909000079	ADIDAS T-SHIRT - RED / LARGE	RSHIRT	ALL DAY OFFICE SUPPI	PARTS AND ACCESSORI	FULL 18%	24.00	NOT SPECIFIED
909000080	ADIDAS T-SHIRT - WHITE / LARGE	RSHIRT	ALL DAY OFFICE SUPPI	PARTS AND ACCESSORI	FULL 18%	24.00	NOT SPECIFIED

At the bottom, there are several buttons: Sale, Points & Offers, Kits & Combos, **Copy To Variant**, Print Labels, Pictures, Commission %, Stock History, and Stock Adjustment. A note at the bottom left says: "After updating or adding a new article, click on refresh to refresh this list." The bottom right shows "QTY In Stock: 4.00".

As far as retails is concerned, this is enough. The next chapter will help you understand how variants work when integrated with your online shop.

### 2.3 Extending variants for your online shop.

Whilst separate products are fine for retail purposes, on an online shop you would normally wish to have them all combined in 1 product, and then the customer can switch between colours and/or sizes. Something like below where the client is simply seeing "Adidas T-SHIRT" but then s/he will be able to choose the colour.

Home / Parts And Accessories / **ADIDAS T-SHIRT**

## ADIDAS T-SHIRT

€24.00

Qty:  **ADD TO CART**

As explained in the previous section, first start by creating the article for the first variant. This shall be known as the Master Article. We will then create the remaining articles, still separately, but linked with the Master Article. When creating the Master Article, since we want it published online, note the following points:

- In Article Name specify colour and/or size. This is still used for retail purposes in your shop. However under "Full Name", do not include colour and/or size. The Full Name is what appears on the online shop.
- Specify the colour and/or size in the appropriate fields at the bottom right.
- In eShop configuration tick "Publish on Web Shop", "Display Availability", "Buy Button Available". Also tick "Hide if out of Stock" and "Shipping Enabled" if applicable.
- In eShop configuration also tick "This is a Master Article" and tick how this product will vary, whether by "Color", "Size", or both.

Main Details	Comments and Options	eShop Configuration	eShop Narrative																		
<p><i>Publish on Web Shop</i> <input checked="" type="checkbox"/> (The following settings only apply if iLabPOS is integrated with an Online Shop)</p> <p><i>Featured Product</i> <input type="checkbox"/></p> <p><i>SEO META Title</i> <input type="text" value="ADIDAS T-SHIRT BLUE"/></p> <p><i>SEO META Desc.</i> <input type="text" value="ADIDAS T-SHIRT BLUE"/></p> <p><i>SEO META Keywords</i> <input type="text" value="ADIDAS T-SHIRT BLUE"/></p> <p><i>SEO Friendly URL</i> <input type="text"/></p>																					
<table border="0"> <tr> <td><input checked="" type="checkbox"/> <i>Display Availability</i></td> <td><input checked="" type="checkbox"/> <i>Hide Wish List Button</i></td> <td><input type="text" value="0.000"/> <i>Unit Weight</i> Kgs</td> </tr> <tr> <td><input checked="" type="checkbox"/> <i>Display Stock Quantity</i></td> <td><input type="checkbox"/> <i>Call for Price</i></td> <td><input type="text" value="0"/> <i>Length</i> mm</td> </tr> <tr> <td><input checked="" type="checkbox"/> <i>Buy Button Available</i></td> <td><input checked="" type="checkbox"/> <i>Hide if Out of Stock</i></td> <td><input type="text" value="0"/> <i>Width</i> mm</td> </tr> <tr> <td><input type="checkbox"/> <i>Allow Customer Reviews</i></td> <td><input checked="" type="checkbox"/> <i>Item can be Shipped</i></td> <td><input type="text" value="0"/> <i>Height</i> mm</td> </tr> <tr> <td><input type="checkbox"/> <i>Free Shipping</i></td> <td><input type="checkbox"/></td> <td><input type="text" value="0"/></td> </tr> <tr> <td><input type="text" value="Additional Categories"/></td> <td></td> <td><input type="text" value="No Backorders"/></td> </tr> </table>				<input checked="" type="checkbox"/> <i>Display Availability</i>	<input checked="" type="checkbox"/> <i>Hide Wish List Button</i>	<input type="text" value="0.000"/> <i>Unit Weight</i> Kgs	<input checked="" type="checkbox"/> <i>Display Stock Quantity</i>	<input type="checkbox"/> <i>Call for Price</i>	<input type="text" value="0"/> <i>Length</i> mm	<input checked="" type="checkbox"/> <i>Buy Button Available</i>	<input checked="" type="checkbox"/> <i>Hide if Out of Stock</i>	<input type="text" value="0"/> <i>Width</i> mm	<input type="checkbox"/> <i>Allow Customer Reviews</i>	<input checked="" type="checkbox"/> <i>Item can be Shipped</i>	<input type="text" value="0"/> <i>Height</i> mm	<input type="checkbox"/> <i>Free Shipping</i>	<input type="checkbox"/>	<input type="text" value="0"/>	<input type="text" value="Additional Categories"/>		<input type="text" value="No Backorders"/>
<input checked="" type="checkbox"/> <i>Display Availability</i>	<input checked="" type="checkbox"/> <i>Hide Wish List Button</i>	<input type="text" value="0.000"/> <i>Unit Weight</i> Kgs																			
<input checked="" type="checkbox"/> <i>Display Stock Quantity</i>	<input type="checkbox"/> <i>Call for Price</i>	<input type="text" value="0"/> <i>Length</i> mm																			
<input checked="" type="checkbox"/> <i>Buy Button Available</i>	<input checked="" type="checkbox"/> <i>Hide if Out of Stock</i>	<input type="text" value="0"/> <i>Width</i> mm																			
<input type="checkbox"/> <i>Allow Customer Reviews</i>	<input checked="" type="checkbox"/> <i>Item can be Shipped</i>	<input type="text" value="0"/> <i>Height</i> mm																			
<input type="checkbox"/> <i>Free Shipping</i>	<input type="checkbox"/>	<input type="text" value="0"/>																			
<input type="text" value="Additional Categories"/>		<input type="text" value="No Backorders"/>																			
<p><input checked="" type="checkbox"/> <i>This is a Master Article</i></p> <p><input checked="" type="checkbox"/> <i>Apply Color Variant</i>      Custom Variant Name <input type="text" value="Color"/></p> <p><input type="checkbox"/> <i>Apply Size Variant</i>      Custom Variant Name <input type="text" value="Size"/></p>																					

Once you have saved the Master Article, highlight it and create all the remaining variants by clicking on the "Copy to Variant" button. For each of the additional variants ensure you:

- Update the Article Name with the new Colour/Size for shop retail purposes
- Specify the Colour/Size in the appropriate fields
- If necessary, change the price

When using the copy to variant, always copy from the Master Article. This is like a "Copy & Paste" function to a new article, and additionally it will combine the variant with its "Master". You can whether the variant articles is linked with the Master from the "eShop Configuration" tab.

The screenshot shows a configuration panel for a master article. At the top, there is a checkbox labeled "This is a Master Article" which is unchecked. Below this, the "Master Article" field contains the code "R001-001" and a dropdown menu showing "ADIDAS T-SHIRT - BLUE". There are two sections for variants: "Apply Color Variant" (checked) with a "Custom Variant Name" field containing "Colour", and "Apply Size Variant" (unchecked) with a "Custom Variant Name" field containing "Size". Each variant name field has a small blue question mark icon to its right.

Input your stock quantities, and after the next synchronisation with your online shop, you should notice that you will have only 1 product, but where you can choose which colour or size you wish.

**NOTE: You might need to click on “Clear Cache” in nopCommerce to see the drop down list of colours/sizes for the first variant you publish. To do so, login the nopCommerce Admin Panel and you find the “Clear Cache” option at the top right.**

As regards to pictures, make sure you at least have one picture with the master. If you also specify pictures with the other variants, then the picture will switch on the website according to what the customer chooses.

You can safely use “Hide when out of stock” also with variants. If this option is chosen, then any variants are automatically hidden when out of stock. The product will be hidden completely when none of the variants are in stock.

If you unpublish the Master, all of the variants will be un-published automatically from the online shop.

**Note:** In previous version of iLabPOS you had to create a Dummy Master Article (without a colour or size) and attach the actual variant articles to it. This was because if the Master Article ran out of stock, all the variants would also vanish from the Website. You do not need to do this in newer versions of iLabPOS (v3.76 onwards). The product will only vanish from the website once all variants ticked as “Hide when out of stock” are out of stock.
